BSc. In Information Technology

June 2021 – Mar 2025

Rajarata University of Sri Lanka

Major: Web Development | Minor: Machine Learning

Certificates

RUSL XTREME 1.0 Mini Hackathon Rajarata University of Sri Lanka
Oracle Cloud Infrastructure Foundations 2021 Associate

Oct 2024
Sep 2021

Projects

Patima Head Inpainting Backend - Django

- Developed the API backend for Patima-Head Inpainting, an AI-powered GAN application for Headless Buddha Statue head inpainting.
- Integrated deep learning models to process user requests, perform predictions.
- Optimized system performance to ensure efficient data handling and response delivery.

Patima Admin Panel – Angular

- Designed and developed an Admin Panel to monitor user messages, manage accounts, and oversee Patima AI model predictions.
- Implemented features for tracking user feedback and optimizing administrative workflows.

Self Portfolio With Admin Panel – Angular, ASP.NET, MongoDB (Ongoing Project)

- Developed a self-portfolio project with a dynamic admin panel supporting full CRUD operations.
- Built using Angular for a responsive and interactive user interface.
- Powered by ASP.NET for robust server-side functionality.
- Utilizes MongoDB for efficient storage and management of portfolio data.

Lost Phone Finder – Android Studio

- Developed an Android application with a multi-page responsive layout using built-in UI components.
- Implemented SMS command functionality to help users locate their lost phone.
- Enabled remote ringtone triggering and real-time location tracking for enhanced security.
